Cube2 Is Podcast Ready

October 17th, 2006 · No Comments

[Cube2](#), the latest and the [world's smallest multimedia player](#) from [mobiBLU](#) is embedded with the podcast software created by [Podcast Ready](#). Each unit of Cube2 is pre-installed with myPodder, the Podcast Ready's management software for podcast.

With this technology from Podcast Ready, downloading any podcast show from the Internet is easier than ever. Cube2 users just need to plug the device to any computer with Internet connection and all their subscribed podcast will be downloaded and automatically transfer to Cube2.

The Cube2 also has an internal microphone that can be used for audio recording. mobiBLU likewise incorporate [SRS WOW HD and truBass sound enhancement](#) to the device to give better audio quality. The Cube2 is offered in 1GB and 2GB memory and can play both MP3 and WMA files.

Kudos to mobiBLU for integrating the latest media innovation in Cube2. They immediately respond to the growing demand in podcasting and make accessing podcast a lot easier.
